

5-14 National Test Results 2000-2004

Highest 5-14 National Test levels achieved by group A school pupils in P6, P7 and S1 in 2000-04

5-14 levels in National Test subjects among Group A deaf pupils are shown in the table on the following page. The level shown for each pupil in each year group in each subject represents the highest level reported as being achieved in that subject in that year. All pupils are included, including those in 'SEN' provision.

Three consecutive year groups have been chosen, comprising the top two years in primary school (P6 and P7) and the first year of secondary school (S1). It is expected that Level A should be achieved by most pupils between P1 and P3 and that Level B will be achieved by most pupils by the end of P4.

Note that the questionnaire return rates are slightly less in 2003/04; this should be taken into account in relation to any downward trends in year four.

Highest 5-14 National Test levels achieved by group A school pupils in P6, P7 and S1 in 2000-04
